Dear John:

Hi John:

Ex. 5 Deliberative Process (DP)

I think we may need to talk about how you want to report all this.

Subject: URT cancers in animals

Hi Ravi,

I can't remember if you had a chance to take a look, but I had previously asked if a table and graphic I inserted into the "URT cancers in animals" section looked accurate (the most relevant comment is right before the table in the attached)? Do we have detailed survival-adjusted data for these tumors?

I will probably modify the graphic a bit to reflect sample size, but if you could take a quick look at the attached (which is not necessarily the most current version, but contains the materials important for you to take a look at) that would be helpful. I guess this would only take a couple minutes.

Thanks,
Andrew
